

Enige opmerkingen

Dit compatibiliteitsoverzicht is voor u ontworpen. Het is vaak zo dat gebruikers van navigatiesystemen niet weten welk type navigatiesysteem ze hebben. Deze informatie is echter van het grootste belang om de juiste navigatiekaart te kiezen wanneer de gegevens moeten worden bijgewerkt of wanneer u extra mogelijkheden en dekking wenst aan te schaffen.

Dit document geeft een overzicht van alle ingebouwde navigatiesystemen waarvoor Tele Atlas digitale kaarten levert, gesorteerd op type en merk, vaak voorzien van een afbeelding.

Compatibele systemen worden vermeld met de datum waarop ze geïnstalleerd zijn of vanaf wanneer ze verkrijgbaar waren en, in sommige gevallen, de datum waarop ze voor het laatst aangebracht werden of verkrijgbaar waren in de markt, bv. 12/2000 (december 2000) tot 12/2005 (december 2005).

Indien er nog steeds onduidelijkheid bestaat over welke digitale kaarten compatibel zijn met een bepaald navigatiesysteem, probeer dan één van deze oplossingen:

- Verwijder de huidige digitale kaart en schakel het systeem daarna uit en weer aan. Sommige systemen zullen vragen om de juiste digitale kaart in te voeren (bv. "Voer een TravelPilot DX cd in").
- Door te kijken naar de huidige digitale kaart (cd, dvd, SD-card, Flash Card etc.) kan ook een indicatie worden verkregen van de algemene compatibiliteit, aangezien die gewoonlijk het logo van het navigatiesysteem of platform bevat (bv. Blaupunkt, VDO Dayton etc.).
